Skills

- C++
- Python
- C
- Kubernetes
- Nodejs
- Docker
- Sql
- CI/CD
- Agile

Education

05/2016

M.E.:

Avionics

Madras Institute of Technology Campus, Anna University

Chennai, TamilNadu

Velan D

Summary

Senior Software Engineer at Amadeus with a proven track record in backend engineering and AI engineering. Specialized in high-performance C++ and in building scalable services with Node.js and Express.js, backed by SQL databases. Experienced in containerizing applications with Docker, orchestrating them on Kubernetes, and automating build, test and deployment pipelines with GitHub Actions for CI/CD. Successfully migrated applications to Azure, enhancing scalability and performance. Adept at collaborating in agile teams, I excel in problem-solving, system design and optimizing code efficiency to deliver impactful results.

Working Experience

Amadeus - Senior Software Engineer

06/2023 - Current

- Developed and maintained reservation system and departure control system for ticket management and boarding activities.
- Worked on developing features which will reserve seats for some percentage of seats with features to specific customers
- Worked on creating an audit trail for PII (Personally Identifiable Information) data, including data modeling.
- Built scalable backend services with Node.js and Express.js, backed by SQL databases.
- Containerized applications with Docker and orchestrated deployments on Kubernetes.
- Automated build, test and deployment pipelines with GitHub Actions for CI/CD.
- Worked with PostgreSQL DB for analyzing data.
- Contributed to green IT initiatives by optimizing memory usage and runtime efficiency.
- Participated in system design activities to ensure alignment with project requirements.
- Designed testing frameworks using PYTHON, including Robot Framework.
- Collaborated within agile team to deliver user stories on schedule while resolving blockers.

Gridraster Pvt. Ltd. - Software Engineer

04/2020 - 05/2023

- Integrated log4cxx stack to aggregate logs effectively.
- Implemented message exchange server in nodejs
- Migrated application from m71 and m62 versions of WebRTC to m84.
- Created clients for Win32 server and client applications.
- Integrated authentication features into Win32 applications.
- Rendered content for Hololens 2 to enhance user experience.

Comavia System Technologies Pvt. Ltd. - Engineer

Bangalore, India

02/2019 - 03/2020

- Developed Python scripts for diagnostics of avionics integration rig.
- Performed hardware-software integration testing on safety-critical embedded systems per D0178B standards.

Centre for Aerospace Research , MIT, Anna University - Project Associate

06/2016 - 02/2019

- Worked in development of prototype vehicle capable Target Localization using C, on video camera mounted on gimbal.
- Deriving state estimation algorithm in UAV for sensor fusion using python.
